

Smashball: a Smashing Success in Canada

After a trial period of several months using our beautiful Dutch volleyball variant, the Saskatchewan Volleyball Association informed us that they will adopt Smashball for all volleyball clubs in this region as boys introduction program.

Saskatchewan has a population of ca. 1.150.000 and 50 volleyball clubs.

Also, since the past couple of weeks we are in contact with another regional volleyball organisation from Canada that wants to roll out Smashball in their province actively. This is an even bigger province.

We supported the volleyball organisation by, amongst other things, providing them with the level cards and the Smashball book (both written in English).

We're heading for a global dissemination of Smashball.
